

Key Vocabulary

amphibians	Amphibians live in the water and on land as they grow older
birds	All birds have a beak, two legs, feathers and wings
fish	Fish live and breathe under water. They have scaly skin, fins to help them swim and they breath through gills.
mammals	Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby.
reptiles	All reptiles breathe air. They have scales on their skin.
carnivore	Carnivores are animals that mostly eat other animals (meat)
herbivore	Herbivores are animals that only eat plants
omnivore	Omnivores are animals that eat both meat and plants.

Linda Brown Buck is an American biologist. She won the Noble Prize in 2004.

Key knowledge

Mammals

human mouse dog cow

Birds

penguin chicken flamingo robin

Fish

goldfish tuna shark eel

Reptiles

snake tortoise lizard alligator

Amphibians

frog toad newt salamander

Senses

sight hearing touch taste smell

Parts of the Body

head eye nose teeth ear mouth shoulder elbow hand thumb fingers knee leg foot toes

I will be able to

- Identify and name a variety of common animals
- Name some carnivores, herbivores and omnivores
- Describe and compare the structure of some common animals
- Identify and name basic part of the human body

Investigation

- Identify and name common animals including fish, amphibians, reptiles, birds and mammals.
- Identify and name common animals that are carnivores, herbivores and omnivores
