

Working scientifically Year 3

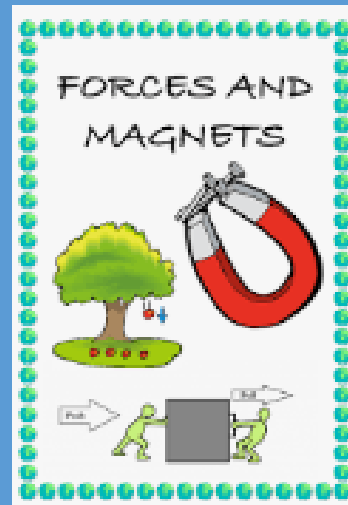

How will we find out which magnet is strongest?

What will we measure?

Which material will we use?

Do the magnets need to be touching the object to find out?

Set up a simple enquiry
Comparative test
Recognise variables
Collect data
Make observations
Explanations

Which magnet was the strongest?
How do we know?

How else can we test to see which is the strongest?

Can you order the magnets from weakest to strongest?
