

Working scientifically Year 4

Are you able to group living things in different ways?

Where are we going to look for living things in our school grounds?

What living things would you expect to find?
What living things did you find?

What do these plants and animals have in common?

Making careful observations

Gather evidence

Use drawings and diagrams

Record data

Classify data

Identifying differences

If we looked at a different time in the day would we find different things?

How can you classify these living things?

Could you not find something you expected to see?
