

Working scientifically Year 4 Sound—Pitch

What are the differences between these sounds?

Which sound is the highest /lowest??

How can we change or alter the pitch?

How will you investigate your question?

To ask relevant questions
To use different types of scientific enquiry

To carry out a simple test

To make observations and look for patterns in the results

To say what was found and to link cause and effect

Are there any patterns you can spot in your results?

What are you going to observe?

Does your question include what you want to change?
