

## Working scientifically Year 5

Can we present our research clearly using scientific language?

Find two species that reproduce in different ways.

What are the most important stages you have found out about their life cycles?

How will you make this clear in your presentation?

Ask relevant questions

Research

Secondary sources

Reporting

Presenting research

Recognising similarities and differences

Key vocabulary

Which key science words do you need to include in your presentation/report?

What similarities between your animals have you found?

How is this different to your other animal?
