

Working scientifically Year 5

How can we make sugar dissolve faster into water? What factors might affect that?

Which factor will you investigate?
What question will you ask?

Which variable will you test and which ones will you control?

What equipment might we need?

Comparative test

Variables

Gather/record

Data

Observations

Labelled diagram

Bar charts/graphs

Identifying

Explanation

What went well in our investigation and what could we improve?

How will we record our data and what will we find out?

What will we measure and how will we know?
